Estill County High FCCLA
Irvine, Kentucky
Title: "No Child Left Behind"

The chapter's project, "No Child Left Behind," focused on the consequences of leaving children unattended in a vehicle. Estill County High School students have designed a project with props and a PowerPoint with additional information including a video that shows how fast it heats up inside a vehicle and costumes which has them dressed as police officers. In addition, they are working with kidsandcars.org. They also worked with Angela Capperelli and Susan Davidson of "Sisters of Invention," who have designed the Halo System an alarm which sounds if a child has been left in a carseat and their partner SafeKids.
